Most of our energy comes from fossil fuels: oil, coal, and natural gas. Fossil fuels are from plants and animals that lived millions of years ago. They are nonrenewable energy resources since they take millions of years to form, and we cannot replace them easily. By burning oil and coal, we get energy. It may be impossible to find them someday to create this energy. We need to use less energy to save these natural resources for the future.

There are many options to lower home energy use with simple changes and good energy habits. It is about being aware of our energy uses. Simple actions can reduce energy consumption. Many people are using more and more energy. It causes our weather conditions to change and may result in higher energy bills. We all need to be more energy efficient and use less, reuse, and recycle it in our homes. Working together to save energy will help us have a healthier planet for future generations.

Trees are important plants that are everywhere. They are in different shapes and sizes, but they all are valuable and beautiful. Trees give us clean and fresh air. They take in a dangerous gas called carbon dioxide produced by burning fossil fuels, and they give out oxygen, which is necessary for life. Without trees, the air would not be healthy.

Trees provide a safe place for animals. They are homes for many of them and also give food to those animals. Trees make us cool on hot and sunny days. Their leaves provide a place to relax and have picnics. They also help stop the land from washing away with their strong roots. People can also use the wood from trees to make houses, tables and paper. In conclusion, humans should consider the importance of trees for the earth.
